	NT1025-X-00028	54" x 59" 0.9mil	

Can't Find Your Container?

Follow these steps to choose the optimal Natur-Bag® liner:

All measurements are in inches and taken from inside dimensions

Step 1: Determine container dimensions.

Square Container:

- Measure all 4 sides
- Measure the base diagonal
- Measure the vertical length

Round Container:

- Measure the base and top diameters
- Measure the vertical length

Step 2: Calculate the liner size.

Square Container:

Liner width = Sum of all 4 sides ÷ 2
Liner length = Container length + (base diagonal ÷ 2) + 4" (to account for overhang)

Round Container:

Liner width = Top diameter X 3.14 ÷ 2
Liner length = Container length + (base diameter ÷ 2) + 4"

Step 3: Reference the Natur-Bag Stock® Product Offerings table on the previous page to select the appropriate Natur-Bag® liner.

We recommend using Natur-Bag liner samples to ensure the determined liner size works for you.
